 NTNU

Norwegian University of
Science and Technology

Norwegian University of Science and Technology (NTNU) – Norway's premier university in IT

Norway's primary institution for educating the nation's future engineers and scientists. NTNU aims to be internationally outstanding by providing researchers with the best conditions for the academic development. It has a special responsibility to conduct interdisciplinary research and works in close partnership with an (inter)national business community.

Department of Computer and Information Science

The Department is considered the premier Computer and Information Science program in Norway and conducts top of the line research in a wide area in the field of IT.

Research Groups

- Algorithms, HPC, and Graphics
- Computer Architecture and Design
- Data and Information Management
- Information Systems and Software Engineering
- Intelligent Systems

Department of Telematics

The research at the Department focuses on communication networks and networked services that encompass technology, society, and economics.

Research Topics

- Communications networks & services
- Internet of Things
- Cryptology
- Intelligent Transport Systems

Leadership program for women in Computer Science

Gender balance in academia is a recognized goal in Norwegian society. We decisively promote gender balance through special projects such as this. We offer a broad range of opportunities for women to advance their academic careers.

Program Goals

- Strategy and leadership development
- Increasing networking possibilities
- Encouraging women to take leadership positions
- Acting as mentors for other women
