

Think of an ethical question

Use of big data

Who "owns" my data?

Super-human AI

How can you protect user privacy ?

AI in the (far?) future, where are the boundaries? Is it possible that computer control us?

Ads/news tailored to the user

human responsibility for ML and AI actions

How transparent these systems are? How accessible these systems real are?

When a computer program should have rights?

Think of an ethical question

How much my personal informations are shared among companies?

privacy

how should I face sensistive issues with specific categories?

How to prevent algorithms from being biased and discriminative?

Should people be allowed to be anonymous on the internet?

Real AI .

If a self-driving car has to decide whether to run over an old person or a group of children..

What is freedom of speech and what is too far

data collection ,and how the company use the data

Think of an ethical question

Is all the information bound to be secured?

Who is making statistic over users data, and who is buying them?

privacy concerns about location

Kids using the Internet unsupervised

Who owns my media traces on the internet?

Will computer system help or risk our lives ?

does google maps(google) keep high standards of security for location data? For users security reasons

Can I sell my data and make money myself instead of letting other companies do it?

is it correct how they control us? exmple: Cambridge analytic

Think of an ethical question

Showing contents that are harmful to users or not even though they want to see it? Freedom against harmfulness

Isn't an AI supposed to have emotions and be able to make decisions on its own (without prior knowledge) to be considered comparable to human intelligence?

maternity for men

How do you understand Gender Equality?

Equal opportunity for any gender

equal pay

Skill based promotion and pay

Equal rights for men and women

Equal treatment

Same rights, same span of control for both sexes

equal pay

Equal opportunities for all the genders to achieve their aspirations.

When men and women have the same opportunities and receive equal treatment in their private and work life.

How do you understand Gender Equality?

The same opportunities for both men and women

Giving the same possibilities to all genders.

share the same power and duty

People of different genders have same rights and possibilities as well as same duties.

same opportunities and recognition for all unman beings by taking into account differences

Equal opportunities based on aptitudes and merits without judging people on how they identify themselves

Different genders should have the same chances of getting the same job or being paid the same amount for it.

When you judge people for their actions and merits and not for their gender

Same rights and opportunities independent of one's gender

How do you understand Gender Equality?

Same same

Gender should play no role in decision making (e.g., hiring decisions, pay decisions, parental custody)

Complete equality in every aspect of life

There should be no gender distinctions whatsoever. Same salaries, rights, privileges.

That the gender will not influence in our profesional status

Means same opportunities for both sexes

It's not men domination but women can also participate.

I don't

responsible

How do you understand Gender Equality?

Gender equality means that people of different genders should not be treated unfairly.

Each gender is performing better with different measurement units. So we shouldn't think that they should be equal by the same criteria.

Which of these questions is most relevant to you?
